Comments: Even If I do not live near the area of concern, I still am exercising my online voice as an American to offer my opinion and worries about Project #60950

It is disturbing that you rejected the suggestions of environmental groups that any salvage logging focus on high use roads and those that have specific characteristics that make logging advisable.

- It would also be of use to start eliminating the thousands of miles of roads that are a holdover from a bygone era of cowboy logging. We certainly don't want to salvage log near roads that should in fact be left to turn back into forest.
- Your proposal ignores the possible impact on critical habitat for multiple species, including salmon and the spotted owl. It also may degrade conditions on hundreds of watersheds.
- I agree with EPIC and other environmental groups that the project area is too big and impacts are too great to rely on an Environmental Assessment (EA). The agency must conduct an Environmental Impact Statement (EIS) before continuing forward.
