Title:

Comments: Paul,

To follow up on our telephone conversation recently regarding Project 61390, I would like for you to include my comments/concerns on record.

I would like to request that you go back in history between the Carson N.F. and Taos Ski Valley Ski area and review the plan regarding the Taos Ski Areas 50 Year Master Development Plan which was not followed or completed as approved to be implemented as required under the (NEPA) National Environmental Protection Act. Will history be repeated in regard to the additional and new proposed projects by T.S.V. Ski area?

I recommend that a (EIS) Environmental Impact Statement is conducted. A (FONSI) Finding of No Significant Impact or an (E.A.) Environmental Assessment will not be enough.

I will follow up with a list of Environmental Impact Concerns at the time a public hearing is scheduled.

/S/ Phillip Taofya
