Comments: Egregious! I am vehemently opposed to the "improvements" proposed for the Mendenhall Glacier areas. NO motorized fuel burning watercraft allowed on the lake, NO more needless destruction/degradation of sensitive wildlife habitat, NO more pavement, NO more buildings in wildlife habitat, NO salmon viewing window, that is destruction of the spawning stream, NO pavement/trails on the beaches that support Tern nesting, NO,NO, NO! Not now not ever. The glacier is receding, allow visitors to see that in a movie produced by a local film maker or a hologram exhibit. How about much needed maintenance on already existing trails, trash cans and toilets for everyone! And PUT A LIMIT ON THE NUMBER OF VISITORS AND TOURS!
