Comments: To Whom It May Concern;

I went to camp on Lake Tarleton for 10 years growing up, and have visited many times since. It is one of the purest forms of beauty in this country and especially in the region. The lake isnt huge and any development or deforestation of the area greatly affects the entire ecosystem.

After reading through the proposed plans, I cant understand how there are feasible opinions to corrupt and pollute the entire area. I am vehemently opposed to this, as I was several years ago when a similar legislation came through and was ultimately voted down.

I hope the same occurs here.
