Comments: To whom it may concern,

The forested region around lake Tarlton is one of the most scenic vistas I've experienced in my life. While spending my time there I got experience the outdoors in a way that shaped me into the person I am today. It would be nothing short of a tragedy to see this beautiful landscape deforested, thus depriving future generation the opportunity to experience what I did in my youth. Please reconsider this plan to deforest the Lake Tarlton Area.

Thank you for your consideration,
Travis West
