Title:

Comments: i would like to see our forest managed correctly and proactively by thinning it out. While I would like to see the U.S. Forest Service do something constructive (as opposed to watching the forest burn), I also want to see the implementation of forest allotments to Ravalli County residents. We can fill a great need for less expensive building and burning material for winter house warming, while cutting cost on the work to get the forest thinned. Those who accept their parcels will be responsible for the thinning. Cut costs and provide Ravalli County citizens

a way to take responsibility and gain while improving our forest lands..
