Title:

Comments: We need an EIR the impact of this massive sale.

The North Region in particular is very vulnerable to the impacts of the thousands of miles of roads you plan to cut. Our fish are devastated by the massive amounts of sediment that come from these cuts.

Please minimize new road construction.

Please NO CLEAR CUTS

Please reduce and remove ALL of the unneeded Maintenance Level 2 roads. Get rid of them.

DO NOT CUT Northern spotted owl Critical Habitat Unit

DO NOT allow commercial logging within Late Successional Reserves and Riparian Reserves.

Please protect Tier 1 key watersheds and Critical Habitat for threatened and endangered salmon.

The citizens of California DEMAND Environmental Impact Statement for a massive, destructive project like this.

Cal Fire's reputation is at stake. You are now seen as a tool of the timber industry. Please start protecting our public lands not logging them.
