Comments: I am writing to ask that the forest service reconsider it's plan to clear-cut and work with foresters to come up with a new prescription that will allow people who recreate on the lake to continue to enjoy the good water quality and views that we love. As someone who both works in forestry as well as conservation, I understand that there are many ways to log an area, and I'm asking the USFS to make a compromise between financial interests and the wants of community members.
