Title:

Comments: I support the fuel-reduction project in the Bitterroot Valley. When we moved here 9 years ago, we asked locals what they didn't like about living here. Lack of restaurants and poor air quality due to smoke in the summer were the reasons. They can learn to cook for themselves (smile!), but when air quality is poor, it affects us a lot. I'm a triathlete and runner, and also have a dog and a pair of rats who have sensitive respiratory systems. To improve everyone's quality of life (with help from our air filter), please support this project to reduce the extent of wildfires!
