Comments: I support the removal of understory brush with clearing on the west side above Victor in the Bitterroot Valley . I would also like to see selective harvest occur in the Bear Creek drainage Fred Bear drainage and Big Creek drainage in addition I would like to see roads opened back up on the west side to be utilized both by the public and the agency for recreation and to access fires that start in wildland urban interface . It is vital to rerun the Westside face back to its native open stands to protect the valley floor and provide better habitat for big game
