Comments: To Whom it May Concern.

I would like to write in support of the Sand Lake Restoration Project's proposed Buzzard Butte Mountain Bike trail network. This recreational development will introduce a user group with passion for positive stewardship of Public Lands. The potential community impact, especially for local youth, is very inspiring and will continue to diversify outdoor culture and tourism in the Pacific City area. The local MTB advocacy group, TORTA, has worked hard to create culture and policy to support this development. Plus the terrain and environment is amazing for year-round riding! Thank you for your consideration.
