Last name: Miller

Organization:

Title:

Comments: I fully support this effort. It is important to get this program implemented as fast as possible. While we can not eliminate fires we can certainly do more to make the intensity of a fire way less. Working proactively to reduce the fire load will lesson the possibility of severe fires and save structures as well as reducing the probabilities of smoke filled summers. Wildlife will fair better and the whole environment will benefit. Please move forward with the full project.

Thanks,

Bob Miller
