Comments: As a north Idaho resident since 1978 I fully support the salvage and restoration project. I recreate extensively in the North Fork of the Coeur d'Alene River drainage. Salvaging to fund future projects to prevent these catastrophic fires is good business. Restoring these burns with fire resistant flora is good science. Please restore this area and any future/past burns to prevent more tragic loss and to beautify the drainage. It's not always about the money made from logging but the experience of spending quality time in this wonderful creation.
