Comments: I have lived in the Montrose/Ridgway area since the early '90's. Blue lakes visitation has exploded in recent years. Unfortunately, resource damage and overcrowding have significantly degraded the visitor experience. I support the concept of a permit system for both overnight camping and day use. However, I'd like to see the permit cost kept to a minimum. I've seen such permit systems in Oregon function with a \$3-5 fee. That way, the permit system doesn't function as an economic filter, favoring those with higher incomes. Thanks for your consideration in this matter.
