Title:

Comments: The "conditions based" approach to NEPA fundamentally undermines the purpose for NEPA to provide a look before you leap. Not only are we, the public owners of the BNF not told what the project will do where, but given the long time frame of the project and the quickly changing conditions the unspecified 'when' is key information.

Rather than provide specific comments, which are precluded by lack of specific proposals, I will provide a list of comments:

No new roads, "temporary" or otherwise.

No ground disturbing activities in Inventoried Roadless Areas, Recommended Wilderness Areas, Wilderness Study Areas or Wilderness.

No disturbance of Old Growth stands.

No logging/thinning of any trees larger than 12 inches dbh.

Stop clearcutting.

Provide a thorough and accurate assessment of impacts to climate change from this project.

Do no harm.
