Title:

Comments: I support the critical analysis being done in this project. I do not support salvage logging and ask that the impact on the landscape be as minimal as possible. As a former State Forest Service Employee focused on wildfire mitigation, I am very aware of the benefits (as well as devastation) of fire on the ecosystem. Much of that depends on how the landscape is managed after fire and ask that the impact and intervention be restricted to those interventions be limited to those needed for safety.
