Title:

Comments: I am a long time resident in the Bitterroot Valley and would like to express my support for better maintenance of the Bitterroot and the surrounding forest areas. The air quality in this Bitterroot Valley is dangerously unhealthy for residents who live and work here. In the past, we have been told to leave our homes and seek a healthier place as the air quality is so poor. Not all people have the ability to escape the danger; including the elderly and the most economically vulnerable. Please place the Bitterroot Front Project at the highest priority to help not only protect the forest areas, but the people who are in jeopardy from the constant summer wild fire danger and the terrible air quality that affects our health as well. Thank you, Tamela J Meyer
