Comments: Hello,

I'd would support any controlled burns that are planned now and into the future. They represent an integral part of what's missing in our forests. I'd recommended a minimum of every 10 years for burns to take place.

I do not support clear-cuts larger than 5 acres in size. These would represent visual degradation of the valley.

I don't support any new road building on our National Forests as they tend to depredate the areas afterwards inviting more recreational uses that wouldn't be normal for those effected areas.

I would encourage logging to take place only on a selected harvest structure and where it makes sense for habitat improvements, along with fire buffers.

Thanks for the opportunity to comment
