Title:

Comments: I support this project as a resident of the Bitterroot front community. We need to thin our forests everywhere, all you have to do is walk into them to realize this. Our forests weren't meant to have hundreds and hundreds of spindly one or two inch diameter trees per acre. Go look, NOTHING grows in these overgrown areas, wildlife doesn't live there, there's nothing for them to feed on, wildlife just passes through these areas.

I not only support mass thinning, but funding to thin re-growth as it comes up. Let's manage for fire and wildlife. Thank you.
