Comments: I oppose any plan to clearcut the national forest on the west side of the Bitterroot Valley through Ravalli County. The east side forest is to be cut and it is not appropriate to destroy all of the views and recreational opportunities for the whole valley. Darby to Florence ??!! That is abusive to the citizens and also not at all helpful to the hunters and anglers and will ruin the tourism that is one of the only financial drivers in the valley. And for what? This will not reduce forest fires, only encourage them through the usual clearcut process of building slash piles, to provide fuels but not habitat for wildlife.
