Title:

Comments: I object to mine expansion on grounds that commercial activity on lands belonging to the public is already way over done in relation to concurrent mission of Fish and Wildlife to protect, preserve and perpetuate fish, wildlife and ecosystems. As a member of the public I say stop the exploitation by big money and remember we are facing mass extinctions due to degradation of our lands. Development should come to a halt out of respect for the climate disaster we face and in view of the favoritism Fish and Wildlife has been showing to commercial interests historically and the peril we now face because of it.
