Comments: I strongly oppose the mine. How many times have mining interests told us that the tailing dam is safe and there will be no failure. It may be years in the future but and the mine may have extracted the ore and closed down then the dam breaks. The environmental damage is great and cannot ever be really fixed. The Berkeley Pit, Anaconda, etc. are examples in Montana's history. Don't succumb to the pressure for short-term financial gains and long-term loss to all of us. Montanans choose to live here due to the natural resources of streams, forests, fish and wildlife. Don't sell us out because of mining pressure. That has been the unfortunate history for this state for too long.
