Comments: I am a wildlife biologist and outdoor recreation enthusiast, including backcountry skiing. I have knowledge on impacts to wildlife from recreation, while having passions in continuing my adventures. I strive to reduce impacts to wildlife and thus am commenting here. Snowmobile season should close April 30 to avoid conflict between motorized and non-motorized oversnow use on Beartooth Pass. Sublette Pass should not be designated as a snowmobile trail - it makes conflict worse. New motorized routes and trail miles should not be added in Inventoried Roadless Areas, sensitive wildlife habitat, adjacent to the Fitzpatrick Wilderness, or across eligible Wild and Scenic Rivers, and snowmobile use should not be increased in the High Lakes Wilderness Study Area. Thank you.
