Comments: I support moving forward with the Red Lodge Mountain Fuels Project. After seeing the devastating fire so close to the town of Red Lodge in the summer of 2021, I seems like a perfectly appropriate action to take (especially given the volatile nature of the weather these days!!). My only concern would be this: with the recent flooding of Red Lodge and surrounding communities, will the Forest Service be able to take on this project without adversely affecting the community as it begins to heal and rebuild from the June 13 event?
