Title:

Comments: This is logging and road building in Wilderness under the "guise" of Wildfire suppression. There is no environmental impact statement regarding adversely impacting Wildlife by loss of habitat. Our public lands and WILDLIFE (PROTECTING them) is a PRIORITY! Logging, road building, along with drilling and mining must stop on public lands; along with HUNTING/TRAPPING and grazing. The aforementioned are destroying the ENVIRONMENT and hastening BIODIVERSITY's extinction (ultimately concluding with our own extinction). It's imperative that Wilderness remain pristine Wilderness.
