Comments: Greetings:

I am opposed to ALL road construction on ALL publicly owned lands, especially National Forest land.

I am opposed to ALL commercial activities, including timber harvesting, on ALL publicly owned lands, especially National Forest land.

The destruction and elimination of wilderness and wild lands through road building, commercial access & use, motorized access & use, etc. has gone on far too long. The new "normal" is killing the wild and all the creatures that live within.

The must put aside wild lands and wilderness for no use, off limits to any commercial or motorized or industrial access or use, and left alone...especially National Forests.

Humans have overstepped our limits and failed in our responsibilities to the natural, wild, and wilderness worlds.

Thank you for consideration and concern.

Take care.

peter
