First name: Wendy

Last name: Ransom

Organization: american citizens

Title: Voter

Comments: Please ask yourself the true and main motivation for this project. Pressure from commercial logging companies that stand to gain from this project? Can you honestly say that in future years you won't discover that this was the absolutely wrong way to manage our forests? And then it will be too late. I believe you should focus on deadwood and snags. Please leave healthy trees alone, even if they don't mean the most profit for the logging companies, who surely have a vested interest in taking as many trees as possible! America is watching how you handle this! Don't ruin the forest for those to whom it belongs!
