Title:

Comments: Thank you for the opportunity to comment on your Red Lodge Mountain Fuels Project (62354). Given that it is difficult to have a forest without trees or a Forest Service without forests, this project seems to be a solution without a problem. Let's leave the trees alone, the land undisturbed, the wildlife to a quiet existence and find something more meaningful to do with our energy and resources.

Man does not always know best!

Yours truly,
