Title:

Comments: To who it concerns. I look forward to the cleanup of the wildfire damaged trees to open the the forest service roads to the public. Its more than opening the roads, its family time, quality outdoor recreation, fuel and food sales to the local community gas stations and restaurants. For some it also means stress release from a long week by driving the mountain roads. The Four-wheel drive group I belong to is also looking forward to the forest service roads opening as well for some quality outdoor recreation.

Thank You
