Comments: I would like to comment on the Cube Cove project. I am in favor of maintaining full access to this location. This includes turning roads into trails and the maintenance thereof. This should also allow access to the Florence and Kathleen cabins. Utilization of the cabins is hugely dependent upon access. I am aware of the direction of the Land Management Act; however, this act is often in direct conflict with making the wilderness accessible to visitors. I believe the intent of placing these lands in a preservation status was so the taxpayers could enjoy a wilderness experience, and access is everything to that end.

I would also like to add the Cube Cove airstrip should be left open. If necessary it can be maintained by users, but leaving it open allows access by both private aircraft ,and also commercial operators flying clients in to access this area.
