Comments: [External Email]In support of this measure to protect our forests

I would like to add my voice to this measure to protect our forests and to maintain proper procedures to prevent further damage to our forests. Actually, I believe this is necessary in all of Oregon. Our forests are vital to Oregon's income. It is of vital important that the dead and decayed are removed in order to protect the forests and those homes near the forests. Our wild life, as well.

Timber has always been a vital part of our natural resources and the livelihood of our timber industry. I truly believe that this should be our first priority.
