Title:

Comments: [External Email]Comments of fire clean up

To Whom It May Concern:

The damaged trees that litter the forests (standing or not) in the State or National forests should be collected and put to immediate use following our nations seasonal fires. To let them remain for bugs and birds is wasteful and dangerous for our ever growing population.

The road systems, parks and forest trails that serve the public should be made available to the people that contributed to their development as soon as possible.

Thanks you

Mitch Teal, Principal Broker

Consultant / Project Coordination
