First name: Elonide

Last name: Caldwell-Semmes

Organization:

Title:

Comments: I would like clarification on the following:

1. What herbicides (specific names) will be used and to what extent? Will there be notice provided about where they are being used? What steps will be taken to avoid contamination to water sources?
2. Will you provide contact names for the companies doing the work and a supervisor contact?
3. If we find irregularities or problems on the project, who will be our point of contact? And if that person is unresponsive will we have an alternate?
