Comments: As someone who has grown up in Wonalancet, and having seen the clearcutting done by the Forest Service on the Wonalancet range in the 1970's, i have the following questions:

1. How come in the detailed information there is no reference to the scenic impact of the timber harvests?
2. What is the environmental impact of logging trucks and crews entering the Sandwich Range? What is the impact on the aquifer and ground water throughout Wonalancet and nearby areas?
3. What is the economic impact on tourism given how scenic the area is and how much hiking is important to the economic health of this region?
4. Will the timber harvests be clear cuts?
5. When is the intended inception of the timber harvesting?

In short, i STRENUOUSLY object to this plan. the Forest Service deveStated this same region 45 years ago, leaving scars on one of the most scenic parts of the White Mountains which have just healed up in the past decade.

Thank You, I look forwards to your response.

Michael Purves
