Comments: Please reopen the Willamette National Forest. The public has a right to recreate in our beautiful wooded landscape. Please discontinue post-fire logging. Not every old logging road needs "hazards" removed. It sounds like just a "cover" for taking more carbon-capturing trees and habitat from our fast shrinking wild animals. It's not 1950 anymore. We are in a climate emergency, and our forests are the climate solution made right here in the Pacific Northwest. Please rethink these antiquated practices. Thank you.
