Title:

Comments: Ideally, the area should be allowed to fully recover on its own by allowing time and natural processes to heal past damage. At the least, the Forest Service needs to analyze a wilderness-compatible plan if it chooses active restoration, such as one that uses non-motorized hand tools rather than chainsaws and heavy equipment.

Reclaimed roads should not be converted to trails. If the agency does convert them, though, it must mitigate the impacts on wildlife from increased human use.
