Title:

Comments: Cube Cove is healing from the damage caused by past logging, roads, and associated impacts, and the agency's massive "restoration" program using heavy equipment is inappropriate for Wilderness.

The Forrest Service's intent to massive "restoration" program using heavy equipment is inappropriate for Wilderness. There will be more damage and the natural beauty and wildlife will be disturbed.

It only makes sense to not have the Forrest Service do any kind of restoration, let it restore naturally.
