Comments: i do not approve of this proposal on this national forest. i believe natural is better and to send in men with machines that make the soil solid, bring toxic chemicals into the forests, log ghe hel out of the forest, clearly the forest is attacked. that appears to be the policy of the forest service. usda is not an enviro organisation in any sense orf the word. it is an old time power filled agency with lots o fmoney that is into taking the foress down to grow profiteering items that are poison to eat for alot of money. usda is sick and is making poison av ailable to every stomach in america. it is a lousy agency that needs investigation for the way it attacks forests. this proposal stinks. just think about what usda does. its about attqcking forests to put farms on there. look at what they are doing to the amazon these days.
