Title:

Comments: This area us still recovering from actions which included in part the attempt of the Forest Service restoration -- this resulted in damage which would otherwise not have happened (heavy equipment damage) as well as logging and roads.

The very fact that there is a Wilderness Act would indicate none of these extra-ordinary actions should have been taken since they were detrimental to the area.

Please allow this area to recover on its own and not make it necessary to continue to restore what man tries to restore.
