Title:

Comments: I am absolutely opposed to the Forest Service's idea to "restore" Cuba Cove in the Kootznoo Wilderness. Please let this beautiful area recover naturally. I am stunned that the FS would want to clear cut 500 acres near streams, 700 acres along lakes, adding a bridge for massive equipment, etc.

PLEASE let nature take over and do her job. It sounds like this ridiculous restoration project is just to employ people, it's totally misguided.

The FS Plan violates the letter and spirit of the Wilderness Act in several destructive ways.

Let Mother Earth do her job and heal this region naturally to protect the environment of precious wildlife.

Thank you.
