Comments: Dear Forest Service,

I support the proposed Cube Cove restoration project and am encouraged to see the Forest Service appropriately prioritizing restoration projects that benefit communities in Southeast Alaska. The project reflects the priorities of the Southeast Alaska Sustainability Strategy, is necessary for watershed health, consistent with the Wilderness Act and the long term goal of restoring Cube Cove's wilderness characteristics, and supports both traditional and economic uses of the area as well as jobs for the community of Angoon.

Thank you for prioritizing this project and for considering these comments.

Kate Glover
