Comments: I want to thank President Biden for closing the Tongass old growth forest in Alaska to all industrial-scale old growth logging. Is there a way to keep this closing forever? (I am so tired of seeing it as a football between the Republicans who want to cut and the Democrats who want to preserve.) I want to ask him and the administration to follow up on other old growth forests in Alaska and else where in the United States. These places are all we have left. There is no planet B. Please, please conserve and protect! When these places are gone they are GONE! There is NO replacement.
