Last name: publiee

Organization: america citizen

Title: citizen

Comments: i am very much interested in seeing all logging in our natinal sites and forests to be completely shut down. i think we need to reuse wood, paper, plastics and stop assaulting to make more more more. i think we are allowing this planet to be raped. i also believe all forests should be immediately taken out from under administration of the usda the usda is a farm organization and the ethos in farmers is to burn down, log every inch of forest to put a farm up. they have no consideration for any forest or any wildlife and are constantly call for forests to be cut ddown to make money and wildlife to be exterminated jso they are not bothered with their farming. they are destructive and have no place to save any environment anywhere i appreciate farming bu tthis is the wrong ethos to be in charge of forests. we made a decsion that immediately needs reversal. we need environmentalists to save forests because forests are the only things that will be saving us. forests are nature and nature is being raped by usda.
