Comments: I have loved trees all my life and know how important they are in many areas of our lives and the lives of animals that are dependent on them for their very survival! I especially love old growth trees. I've seen them, smelled them, there is an ambiance about them, I can feel them to the core of my beings. Why, the very essence of life is dependent on them, the cooling of the planet depends upon them. We MUST do everything in our power to protect and defend them from malicious individuals who have no concept whatsoever of the trees' importance!
