Comments: What the heck are you guys doing? Last Earth Day, President Biden issued an Executive Order directing the Forest Service and Bureau of Land Management to conserve mature and old-growth forests as a climate solution.

And yet, you are aggressively offering mature and old growth trees for logging sales! Logging these mature and old growth trees and forest areas, destroys their ability to lock away climate-killing carbon and decimates biodiversity. Preserve and protect remaining mature and old growth forests as an essential bulwark against the worst impacts of climate change which will also contribute to decimating biodiversity.

Humans have already destroyed over 90% of Oregon's old growth forests. Protect and preserve the remaining areas and WORK TO INCREASE biodiversity and maturity of Oregon's forests! That should be your mission, not further destruction of our biodiverse forests!
