Title:

Comments: I urge the US Department of Agriculture and US Department of Interior to work together to initiate as soon as possible rules to define mature and old forests to permanently end the avoidable loss to logging their critically important carbon, water and wildlife values. Surely agreements can be made between logging for needed revenue and setting aside, according to best science and in perpetuity, an equitable balance of old growth forest.

I am merely a citizen of a world that is threatened from thoughtless overuse.

Thank you
