First name: April

Last name: Woods

Organization:

Title:

Comments: Climate Change is here and it has just started, the temperatures will go up and up and trees which hold CO2 help to protect us, so we should protect them. Humans are a protect of nature, yet we war against it and now it's time to pay our price. Most likely we won't survive it, but our only chance is doing everything in our power now, to protect nature, protect trees, forests, wildlife, without it we are dead.
