Title:

Comments: Our ancient forests cannot be brought back. So many old forests hold medicines and life that we need to learn from. The trees you want to cut down for the Black Ram project are some of the oldest we have. They may hold the medicine we need for new antibiotics or cures that may save one of your family members. Their canopies may be what saves us from going a degree hotter next summer.

Please exercise wisdom. You do not want this on your conscious - it isn't worth the short term money.

Thank you -
