First name: Louise

Last name: Lipsey

Organization: Bay Area JEA

Title: Chairperson

Comments: Please protect our remaining mature and old-growth forests and trees from logging and development on federal public lands. It is time to start protecting these extremely important trees that are critically needed for the future of our climate and biodiversity.

Stop giving permission to the logging industry to continue removing trees under the false pretense of preventing wildfires. That is causing more wildfires not less, and needlessly destroying our forests and world.

Thank you!
