Title:

Comments: Dear Forest Service,

This forest and the trees are surviving 500-600 years of human destruction. Do you think it is the time to cut them off when we are plunging into the climate catastrophe and in the dire need of having more CO2 eating, O2 producing trees?

Really?

Absolutely not.

Please man up and do your job, and do not succumb to corporate pressure and money. Respect and protect the forest, especially the old growth trees.

DO NOT CUT OUT EVEN ONE TREE PLEASE!

Sincerely,

Zita Fekete
